## Fife Ethylene Plant - Enclosed Ground Flare Project (EGF) Community Update - November 2022

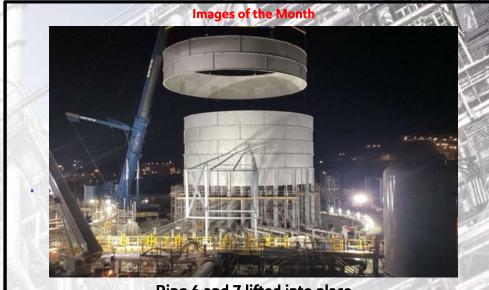

Key Benefits: Reduces use of elevated flare by at least 98% ✓ Quieter than a petrol lawnmower ✓ No vibration ✓ Largely invisible on clear day or night ✓ Completely smokeless ✓ Hidden flame ✓ 1/3 height of elevated flare ✓

## **Progress Update**

- Project targeting mechanical completion by Dec '22 but current forecast indicates mid-Jan 22.
- EGF expected to be operational 2Q23.
- Combustion Chamber floor and Rings 1 to 7 successfully installed.
- Build and lifting of Rings 8 and 9 impacted by weather conditions.
- Multiple pipework hydro tests successfully completed.
- Shroud build trail assembly commenced Oct '22 to assess build method.

## **Stakeholder Communications**

- Continued promotion via UK digital channels
- Exxonmobil.co.uk/egf

Ring 6 and 7 lifted into place
