

Fife Ethylene Plant - Enclosed Ground Flare Project (EGF) Community Update - September 2021

Key Benefits: Reduces use of elevated flare by at least 98% ✓ Quieter than a petrol lawnmower ✓ No vibration ✓ Largely invisible on clear day or night ✓ Completely smokeless ✓ Hidden flame ✓ 1/3 height of elevated flare ✓

Progress Update

- Project remains on schedule to be operational by December 2022
- Manufacturing of EGF now underway with Zeeco (EGF Vendor)
- Piling works continuing for EGF foundation
- Zeeco completed final testing on pilot burners
- Detailed planning for erection of EGF initiated with selected vendor

Stakeholder Communications

- Dedicated web portal: exxonmobil.co.uk/fep
- Door drop to 10,000 households being readied
- New video with FEP Technical Manager to be released shortly
